

## Microelectronics Technology Group CD Request

Air Products Microelectronics Group has created a CD-ROM to help you better understand why Air Products is the leading supplier of gases, equipment and technology to the Electronics Industry. Six short topic segments will give you a sense for the technology, products, applications support and business solutions that Microelectronics customers have come to rely on from Air Products. These six topics are:

**Air Products Capabilities** - Includes an overview of the Microelectronics Group, benefits of inert gas for soldering and results from customers who have implemented inert gas in their soldering processes.

**Inert Gas Soldering Video** - Visually see dross eliminated and then form in a wave solder pot as the atmosphere cycles from inert to air.

**Gas Applications** - This chart shows many of the Microelectronic Applications along with the gases most often employed in them.

**Lead Free** - A dramatic change for the Electronics Industry. Technology drivers, implementation challenges and Air Products offerings are reviewed.

**Testimonials** - Some of our best advertisement comes from our customers. See what they are saying about us.

**APDirect** - Many companies offer information on the internet. Air Products offers business solutions. View a demo of APDirect and imagine how on-line ordering can lower your total cost of ownership for the gases and chemicals you purchase.

To request a CD, please [fill out our online form](#). A copy of the CD will be mailed to you as soon as possible.
