

To make glass better,
put us in the mix.

Our in-house melting experts can help you improve combustion and glass quality, increase productivity, and reduce fuel consumption every day.

From the very first oxygen enrichment applications to our latest CLEANFIRE® burners, we've delivered safe, low-emission oxy-fuel solutions for over 40 years. And, right now, in addition to providing reliable gas supply, our team is optimizing production for hundreds of furnaces all over the world.

Call 800-654-4567, code 123 to put the skills and experience of our global team to work for you. When you want improved melting, add one key ingredient. Us.
