

You need a higher-yield, lower-cost LNG system.
We deliver.

Joe Kugler, Mark Roberts and Bill Merlini are part of the Air Products team that developed the new highly efficient AP-X™ LNG liquefaction system.

The demand for LNG is growing. Competition is, too. Efficient production is more critical than ever. With more than 35 years of experience and the best technology and equipment available, our team can design a system from the ground up or optimize the one you already have. With the introduction of our new AP-X™ system, we can help you achieve 60% or more output per train at the lowest product cost ever.

And, we bring it all right to your door. No matter where in the world you are.

To learn more about how we can improve your LNG efforts, call 800-654-4567 (US), 1-610-481-4861 (worldwide) or visit us online.
