

Extraordinary performance shouldn't have to cost more.

Andy DeFusco and Chris Daniels led the Airflex EF811 team that developed a next generation VAE binder as a high performance, cost-competitive replacement for vinyl acrylics.

Every so often a breakthrough occurs that sets the stage for award winning performance. Introducing Airflex® EF811 vinyl acetate-ethylene emulsion. This next generation VAE offers the proven benefits of VAEs at a price comparable to vinyl acrylics. Airflex EF811 latex demonstrates superior scrub resistance compared to any other emulsion polymer available. Plus, it offers excellent low

temperature touch-up and the low VOC formulating inherent in VAEs. Its broad formulation latitude makes it ideal for interior and exterior applications. So call 800-345-3148 or visit our web site to get a free sample and help your products receive rave reviews.
