

After years of living at 0°F, Mark Williams knows how to create your ideal freezing system.

Mark Williams,
Food Technology Engineer.

Mark and his team design systems and processes that give optimum throughput and efficiency, and integrate smoothly with your production.

When you're as passionate about food freezing as Mark, you'll always devise the very best solutions for your customers.

Indeed, it's people like Mark Williams who have helped Air Products develop the most advanced freezing technologies.

Their deep process understanding, together with dedicated R&D, consistently

produces innovation after innovation.

Call 1-800-654-4567 for details. Whether you want speed, higher product quality or flexibility, we think you'll warm to our knowledge and experience.
