

If it's possible to raise chamber cleaning to an art, meet Michelangelo, Rembrandt and Picasso.

As the industry's foremost authorities on chamber cleaning, Drs. Andy Johnson, Bob Ridgeway and Pete Maroulis have pioneered ways to limit PFC emissions from semiconductor fabs. For their efforts, Air Products received the 2002 Climate Protection Award from the United States Environmental Protection Agency.

When you rely on Air Products for chamber cleaning, you don't get one recognized expert. You get three. Working as a team for 10 years with a passion bordering on obsession, they've developed more than 100 optimizations for over 40 different processes for customers all over the world. They've perfected the recipes and streamlined the processes to offer the lowest cost per clean with the highest yield. And with our reliable global supplies of

NF₃ and C₂F₆, our team can work with any fab in Asia, Europe or North America. Visit our web site or call us to learn more about the finest chamber cleaning available. From the acknowledged masters.

Asia: +886(2)2521 5891
Europe: +44(1932)249959
U.S.: 610-706-4730
