Steven B. Satrom

Vice President, Engineering
Energy Businesses

Steven B. Satrom was appointed vice president of engineering for Energy Businesses in January 2007. In this position, he is responsible for developing and executing new energy projects. He also holds the position of general manager, engineering for the Americas and is responsible for the company's global construction activities.

Mr. Satrom joined Air Products in 1974 after serving as an officer in the U.S. Air Force. His initial assignments involved the management of air separation projects for oil and petrochemical customers, and in 1981 he was named manager of design engineering in the Process Systems Group. Mr. Satrom became director of projects for the company's Environmental and Energy Division in 1988 and later was named general manager of engineering for the Division. Mr. Satrom was appointed senior vice president, engineering and projects for Pure Air—a joint venture company—in 1990; director of procurement for the gases and corporate segments in 1993; and global lead of the HyCO product supply team in 1996. He was named general manager of the Americas Engineering Center in 2003 before assuming his current position.

Mr. Satrom was born in 1947 in Minneapolis, Minn. He received a B.S. degree in mechanical engineering from Penn State University in 1969 and an M.S. degree in engineering management from the University of Dayton (Ohio) in 1972. He is a registered Professional Engineer.
