

## The fast-tracking, quick-curing, no-shot-blasting, so-green-concrete-can-get-going-faster medicine.

*Chemists, Willy Raymond and Susana Grote, have developed Anquamine 287 epoxy curative, the superior green concrete solution. As part of primers and curing compounds, it puts concrete on the fast track without shot-blasting. And that's good medicine.*

Introducing Anquamine® 287 epoxy curative. The only curing agent that makes green concrete fully functional in less than 48 hours without shot-blasting. Which means your customers can cure, prime, and coat in two days, not 28.

Products formulated with Anquamine 287 have outstanding adhesion and bond strength so final finishes grab on and don't let go.

And because it's a zero VOC waterborne epoxy, application and clean-up are easy.

Call 1-800-345-3148 or visit our web site for a free sample and formulation recipes. Anquamine 287 epoxy curative. It's proven relief for shot-blaster headaches.
