

Finally, a waterborne pressure-sensitive adhesive that stays put when moisture shows up.

When a customer called needing a waterborne PSA emulsion with superior water resistance, Air Products Chemist, Sara Conn, had the perfect solution. Flexbond AV190.

Let's face it, moisture happens. And until now, waterborne acrylic PSAs just couldn't deal with it. That's why we created Flexbond® AV190DEV emulsion.

A high-performance, acrylic copolymer, Flexbond AV190 provides superior water, heat and shear resistance with no sacrifice in peel or tack. And adhesion? This stuff doesn't let go. Even on polyolefin film.

Don't fear water simply because your PSA is waterborne. Test Flexbond AV190 emulsion and see for yourself. **Call 800-345-3148 or visit our web site for a free sample and demonstration kit.**
