

Paul Debrah

Mechanical Engineer

Why did you join Air Products?

Because of the broad opportunities available to engineer. It was a place where I could put my technical background to use.

Why do you love working at Air Products? What is it that keeps you working at Air Products?

I love the culture and people. At Air Products, people are treated with respect, fairness, and dignity.

Briefly describe your career at Air Products to date.

Since joining Air Products, I have been working in the LNG department, which designs liquefied natural gas process technology and equipment. I have had the opportunity to meet and work with other engineers, and have been part of successful and challenging projects. It has been an amazing journey so far, and I really enjoy working at Air Products.

What the most intriguing/satisfying thing(s) you've experienced at Air Products?

Definitely the people I work with and the challenging environment.

What career advice would you give to those just starting out in their engineering careers?

Don't be afraid to ask questions. Talk to people of all ages and not just your peer group. Get hand-on experience early in your career. Be open to new challenges and experiences.
