

Dunstan Linton

Principal IT Specialist

Why did you join Air Products?

Because I believed what Air Products offered would provide me with an opportunity to develop my professional career in an environment where my skills and unique work style were valued and appreciated.

Why do you love working at Air Products? What is it that keeps you working at Air Products?

I love working at Air Product because the people are the best in the industrial Gases Business. It's a collaborative environment with constant opportunities to learn. The corporate culture fosters diversity and is centered around excellence.

Briefly describe your career at Air Products to date.

Early in my career I was involved in the design, development and support of Air Products flowsheet and CAD tools. I work with skilled experts and enjoy the growth afforded by seeing the work styles and perspectives of a broad range of teams with which we interact.

What are some examples of the most intriguing/satisfying thing(s) you've experienced at Air Products?

I find it enriching to work with a team to develop PC based Flowsheet design tools. It's a great learning opportunity to grow to understand a team's business needs and, through that insight, help them find the technology tools to make their processes easier, more efficient, more accurate. It's very satisfying to add value for colleagues—and for the company overall—in this way.

What career advice would you give to those just starting out in their engineering careers?

Be open to new ideas and challenges. This type of mindset will provide you with many career opportunities and help your personal skill set evolve and flourish.
