

# Air Products Turbomachinery Technician Field Service

## Benefits

- Safety is our first priority. **Zero** lost time incidents in over 33 years of field service
- Competitive hourly rate
- Most technicians have an associate's degree or higher education in technical/mechanical fields
- Technicians complete robust safety and technical training
- Ability to react and mobilize quickly. Same day field support in emergency situations

## Experience is the Difference

Air Products has been building safe, reliable and efficient turbomachinery for over 70 years to meet growing market demands and customer requirements. Our skilled field service technicians have experience in a broad range of rotating and reciprocating equipment. Each technician has many years of hands-on machinery experience in various industries and plant operations. Air Products field service technicians have the knowledge, experience, and commitment to meet your field service needs.

Air Products field service technicians have completed work in over 24 countries around the world. A wide variety of equipment can be serviced by our technicians including multi-stage compressors, pumps, expanders, and auxiliary systems. With a diverse range of capabilities, Air Products field service technicians will mobilize quickly to perform your work safely and efficiently.
