

Air Products Smart Technology

You never have to wonder where we are . . .

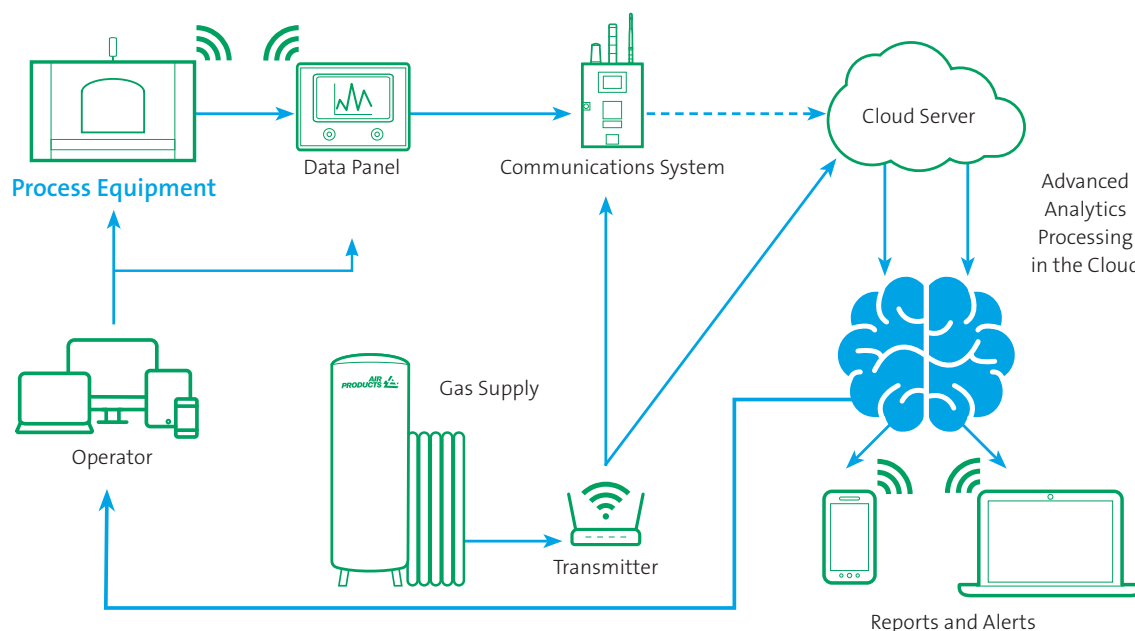

Know when Air Products is delivering, at any time, from anywhere
with Smart Technology Delivery Notifications

Air Products Smart Technology Delivery Notification System is a convenient, reliable way to remotely track your upcoming deliveries. This system will alert you via email, text message or voice call when a delivery is on its way. All data is conveniently stored and accessible via a secure system. Air Products Smart Technology system features our Industry 4.0 approach to process optimization, applying decades of experience in gas supply, applications knowledge, and safety.

Delivery Notifications can alert you of the following:

- Daily alert with upcoming deliveries in the next 24 hours
- Alert when an upcoming delivery is scheduled, providing Estimated Time of Arrival (ETA)
- Alert if an ETA changes
- Alert when delivery is complete
